EDUCATIONAL BACKGROUND

Technological University of the Philippines - Manila, College of Science; 2022-Ongoing

- Course: *Bachelor of Science in Information Systems*
- Capstone Project: *eTire: A Management Information System for QUEEN.R Tire Supply & Vulcanizing Shop*

Philippine Christian University, 2020-2022

- Strand: STEM (Science, Technology, Engineering, and Mathematics)
- Graduated with High Honors

San Antonio National High School

- Graduated with Honors

WORK EXPERIENCE

Dyn Edge Philippines Inc., Full-Stack Software Developer (Internship); January - May 2026

- Developed functional operations for clients using Laravel's framework
- Optimized Database querying using Indexing functions for large dataset
- Created Transfer modules for multiple projects to transfer legacy datasets to newly developed modern projects
- Utilized Javascript, PHP, and NodeJs to create functional processes in line with client requirements
- Integrated Linux's Ubuntu Distro to serve as development environment for projects

Boluntaryong TuPians, University Organization, Volunteer; 2022-2023

- Produced and managed video recordings for publication of large-scale organization events
- Coordinated with other organization members for delegation of tasks and communications

High School Faculty, Student Assistant, 2019-2020

- Leveraged the use of Excel and Word for tracking of student performance and documentation
- Implemented lesson plans that match student strengths and weaknesses
- Managed assessment processes, including exam administration, grading, and data collection of results

PROJECTS

E-Tire – A Management Information System for Queen R. Tire Supply & Vulcanizing Shop

- Developed a robust middleware API for a high-performance rated SME (Small-Medium Enterprises) management system that connects both front-end and back-end operations
- Combined SQL optimization and CRUD operations to reduce latency and improve system responsiveness
- Collaborated with a 5-man Agile team, participating in iterative sprints that align with technical requirements with feasibility constraints and deadlines.
- Architected the backend and SQL operations through nodeJs and PostgreSQL.
- Awarded with one of the “Outstanding System” for 2025-2026 for its excellence in technical execution and domain- specific functionality

Portfolio - A Website Detailing All Accomplishments and Projects

- Developed an interactive website to showcase academic and industry accomplishments
- Utilized NextJs framework for efficient deployment of project with NodeJs as core for runtime environment
- Designed UI/UX using TailwindCSS for inline application of styles and its compatibility with TypeScript

SmartDorm - Design and Implementation of a Smart Dormitory Management System

- Designed the database schema through PostgreSQL logic and policies to ensure data accessibility and security
- Developed an API for connection between frontend and backend operations
- Documented feasibility studies and conducted team collaboration for suitable creation of sprint documentation

PawPedia – A Stylish Website for Pet Gurus and Bookworms

- Developed an Interactive Web Page for Animal Gurus and Pet Connoisseurs

- Designed a page using CSS styling and components
- Implemented Motion adjustments to cards for interaction and functionality

FortunaQuest – *A Simple Fantasy Textual Progression Game*

- Developed a logic-based progression system that utilizes C++'s computation abilities through conditional structuring and state management
- Structured the error framework for consistent handling of conditional acquisition of the different levels of the game
- Utilized algorithmic progression model to stage access in a dynamically unlocked based progress using in-game currency accumulation as a basis

SKILLS

Coding Languages: *HTML5, CSS, JavaScript, Tailwind, Typescript, C, C++, Java, PHP, Python, FlyonUI*

Coding Environments: Visual Studio Code, NetBeans, GitHub, Git, PyCharm, Xampp, CodeBlocks

Frameworks: NextJs, Laravel

Database: MySQL, PostgreSQL

Soft Skills: Researcher, Adaptability, Time Management, Critical Thinker, Self-Directed Learner, Interpersonal Skills, Communication Skills, Resourcefulness, Goal-Oriented.

Languages: Tagalog, English

CERTIFICATIONS

- **Associate Data Scientist in Python** – Ongoing from DataCamp
- **Associate Data Analyst** – Ongoing from DataCamp
- **GitHub Foundations** – Ongoing from DataCamp
- **Intermediate SQL** – Acquired from DataCamp in 2026
- **Responsive Web Design** – Acquired from FreeCodeCamp in 2023
